## MasterUpfitters

## Built to your standards, and ours.

Mercedes-Benz vans are built to meet the highest of standards. It's what you've come to expect from us. And now, it's what you can expect from our growing network of MasterUpfitters. Nothing gives you more flexibility and options than a Mercedes-Benz van. Whether you need a simple work van interior, a mobile workshop, or luxury passenger detailing, our vans can handle any configuration you need. And when combined with the expert craftsmanship of a Mercedes-Benz MasterUpfitter, there simply isn't a more versatile work van on the road.

Find a complete list of approved upfitters at [mbvans.ca/upfitters](http://mbvans.ca/upfitters).

<sup>1</sup>Maximum permissible gross weight of the trailer, if the trailer is equipped with a separate functional braking system. Please make sure to comply with local trailer load regulations. <sup>2</sup>Taxes extra. Excludes vehicle licence, registration, and insurance fees. Prices valid on date of delivery apply. Suggested pricing only. Dealer may sell for less. Accessory pricing does not include installation. All data in this price card is based on the latest information available at the time of publication. Mercedes-Benz reserves the right to make changes at any time, without notice. Prices do not include any other products or services not listed that may be available to you through your selected Mercedes-Benz dealership. See your authorized Mercedes-Benz dealer for details or call the Mercedes-Benz Customer Relations Centre at 1-800-387-0100. <sup>3</sup>COLLISION PREVENTION ASSIST may not be sufficient to avoid an accident. It does not react to certain stationary objects, nor recognize or predict the curvature and/or lane layout of the road or every movement of vehicles ahead. It is the driver's responsibility at all times to be attentive to traffic and road conditions, and to provide the steering, braking and other driving inputs necessary to retain control of the vehicle. Drivers are cautioned not to wait for the system's alerts before braking, as that may not afford sufficient time and distance to brake safely. <sup>4</sup>Blind Spot Assist may not be sufficient to avoid all accidents involving vehicles in your blind spot and does not estimate the speed of approaching vehicles. It should not be used as a sole substitute for driver awareness and checking of surrounding traffic conditions. <sup>5</sup>Lane Keeping Assist may be insufficient to alert a fatigued or distracted driver of lane drift and cannot be relied on to avoid an accident or serious injury. <sup>6</sup>No system, regardless of how advanced, can overcome the laws of physics or correct careless driving. Please always wear your seat belt. Performance is limited by available traction, which snow, ice and other conditions can affect. Always drive carefully, consistent with conditions. Best performance in snow is obtained with winter tires. <sup>7</sup>Rear-view camera does not audibly notify driver of nearby objects and is not a substitute for actively checking around the vehicle for any obstacles or people. Images displayed may be limited by camera field of view, weather, lighting conditions, and the presence of dirt, ice, or snow on the camera. <sup>8</sup>Caution: Crosswind Assist can only act within the laws of physics. If the driver exceeds the physical limits, even Crosswind Assist will not be able to prevent an accident!
